ANALYST NOTE

Hera local LLM

The PLMR GG3_MACD_Momentum strategy shows negligible alpha with a 0.43% ROI and a 0.14 Sharpe ratio, indicating poor risk-adjusted performance. A 50% win rate over just two trades offers zero statistical significance, making the results indistinguishable from random noise. The 14.67% max drawdown is disproportionately high relative to the minimal gains, suggesting inefficient position sizing or weak stop-loss logic. This backtest fails to demonstrate a viable edge for institutional deployment. Increase the sample size to at least 100 trades and optimize entry filters to reduce drawdown before considering live capital.
