ANALYST NOTE

Hera local LLM

The +11.00% ROI and 0.85 Sharpe ratio suggest modest positive expectancy, but the 66.7% win rate is statistically meaningless with only three trades. The 11.43% maximum drawdown indicates significant volatility relative to the gains achieved. This sample size is too small to confirm any edge or statistical significance. Run a longer backtest across multiple market regimes to validate robustness before considering deployment.
