ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v1774 backtest on VOXR failed catastrophically with a -32.73% ROI and zero wins across only four trades. A maximum drawdown of nearly 46% and a negative Sharpe ratio of -1.13 indicate severe underperformance against the risk-free rate. Such a small sample size prevents any statistical confidence in the strategy's validity, suggesting the results are likely noise rather than a systematic flaw. The strategy must be discarded immediately or significantly reparameterized to avoid further capital erosion.
