ANALYST NOTEHera local LLM

The LPG backtest for strategy EVO\_EVOEVOEVOE\_v1780 shows a 40.41% ROI, yet the 66.7% win rate and 1.10 Sharpe are statistically meaningless given only three trades. A 21.82% drawdown is dangerously high for such a small sample, indicating extreme volatility rather than a robust trend-following mechanism. We lack confidence in these metrics because the performance hinges on a single trade sequence that rarely repeats in live markets. The next step is to expand the backtest window to at least 12 months and increase trade frequency to validate the strategy's resilience.
