ANALYST NOTE

Hera local LLM

The strategy delivered a +29.90% return with a 1.34 Sharpe ratio and zero losses, but the 100% win rate is statistically meaningless due to only two trades. This tiny sample size prevents any reliable confidence in the results, as luck likely drove the performance. The 17.75% max drawdown is also uninformative with such limited data. A concrete next step is to re-run the backtest over a longer historical period to gather at least 50-100 trades before drawing any conclusions.
