ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v2254 backtest on VOXR is a statistical failure with zero winning trades and a catastrophic 45.89% drawdown. Such a small sample size of four trades renders the -32.73% loss and -1.13 Sharpe ratio meaningless for any institutional decision-making. The strategy clearly lacks robustness and fails to capture the asset's volatility profile effectively. Immediate next step is to discard this parameter set and re-run the backtest with stricter entry filters and a larger lookback period. This approach is strictly for educational analysis and does not constitute financial advice.
