ANALYST NOTE

Hera local LLM

The strategy generated a +40.41% ROI with a 1.10 Sharpe ratio, indicating moderate risk-adjusted returns. However, the 21.82% maximum drawdown reveals significant volatility during the testing period. The 66.7% win rate is statistically meaningless due to the extremely small sample size of only three total trades. This low trade count prevents any reliable assessment of the strategy's long-term consistency or robustness. The next step is to expand the backtest period to include hundreds of trades before considering deployment.
