ANALYST NOTE

Hera local LLM

The AAVE/USD backtest shows a perfect 100% win rate but is statistically insignificant with only a single trade, rendering the 6.78% ROI meaningless. A Sharpe ratio of 0.47 and 10.67% drawdown indicate excessive volatility relative to the lack of data points. The strategy likely suffered from overfitting or captured a rare, transient market anomaly rather than a robust edge. We must expand the sample size by running out-of-sample tests on different timeframes before deploying capital.
