ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v532 backtest on VOXR is statistically insignificant due to only three trades, rendering the -2.01% ROI and -0.05 Sharpe ratio unreliable. The strategy failed to navigate market volatility, suffering an 11.32% drawdown while generating a paltry 33.3% win rate. Such poor performance suggests the signal logic lacks robustness or is misaligned with current VOXR price action. Immediate action requires expanding the sample size via a longer backtest period or adjusting entry filters to reduce false signals. Without more data, any conclusion about this strategy's viability remains purely speculative.
