ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v761 backtest on VOXR failed with a -2.01% ROI and a -0.05 Sharpe ratio, driven by only three trades yielding a 33.3% win rate. An 11.32% drawdown suggests the strategy lacks robustness during volatility, and the statistical significance is negligible given the extremely low sample size. The entry logic clearly underperformed relative to market structure, indicating a need to refine filter conditions or reduce position sizing. A prudent next step is to retest the strategy with tighter volatility bands or a minimum trade threshold to validate any alpha before live deployment.
