ANALYST NOTE

Hera local LLM

The backtest for GRT/USD under the TS-Momentum strategy reveals a catastrophic failure with zero winning trades and a -20.18% ROI, indicating the momentum logic completely failed to identify valid entries within the limited sample. A Sharpe ratio of -0.95 and a maximum drawdown of 24.83% confirm that the two executed trades resulted in net losses, suggesting the current parameters are ill-suited for the asset's volatility profile. Given the extremely low trade count of only two, statistical confidence is negligible, meaning these results may reflect random noise rather than a systemic flaw in the strategy logic. We must immediately re-evaluate the entry thresholds and consider adding a volume filter to avoid chasing momentum in a
