ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v871 backtest on VOXR failed to generate alpha, posting a negative ROI and a Sharpe ratio of -0.05. With only three trades, the 33.3% win rate lacks statistical significance, making the 11.32% maximum drawdown an unreliable risk metric. The sample size is too small to confirm strategy failure or identify specific execution errors within the logic. I will run a walk-forward analysis on an expanded dataset to determine if the signal thresholds require recalibration or if the approach is simply incompatible with this asset.
