ANALYST NOTE

Hera local LLM

The EVO_WEBIDEA_v1608 backtest on RDN failed catastrophically with zero winning trades and a negative Sharpe ratio, indicating the strategy is currently unprofitable. Only three trades executed over the sample period provide statistically insignificant confidence, rendering the results an outlier rather than a reliable trend. The maximum drawdown of 14.78% suggests excessive risk exposure without any compensating reward profile. We must pause deployment and re-examine the entry logic to filter false signals before recalibrating parameters.
