ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v119 strategy failed catastrophically on RDN, achieving zero wins across only three trades and incurring a 5.59% loss. With a Sharpe ratio of -0.31 and a 14.78% drawdown, the signal logic appears disconnected from current market volatility. Statistical confidence is negligible given the tiny sample size, rendering any conclusion about long-term viability premature. The next step is to backtest this specific logic on an alternative asset to isolate whether the failure stems from the strategy or the specific market regime.
