ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v781 strategy on LPG delivered a 42.10% ROI with a 1.14 Sharpe ratio, but statistical significance is negligible due to only three trades. A 66.7% win rate with a 21.82% max drawdown suggests high volatility exposure rather than consistent edge. We cannot validate the strategy's robustness without expanding the sample size to rule out overfitting. Next, run a walk-forward analysis on a wider parameter set to confirm edge persistence. This approach ensures we do not deploy capital based on a lucky outlier sequence.
