ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v222 strategy on VOXR failed to generate alpha, delivering a negative ROI of -2.01% with a loss of statistical significance due to a mere three trades. A win rate of 33.3% and a negative Sharpe ratio of -0.05 indicate that downside risk dominated the sample, while an 11.32% drawdown suggests poor resilience during short-term volatility. Such a limited dataset cannot support any conclusion regarding strategy robustness or risk-adjusted performance. The next step is to expand the test period or adjust entry filters to generate a statistically valid sample size for evaluation.
