ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v655 backtest on META is a catastrophic failure, registering a -17.5% ROI with a 0% win rate across only three trades. This sample size provides zero statistical confidence and clearly indicates that the current logic is overfitted or fundamentally broken for this asset. A maximum drawdown of 33.28% suggests the strategy entered positions during a severe adverse trend without adequate stop-loss mechanisms. The negative Sharpe ratio of -0.85 confirms that returns are entirely driven by risk rather than alpha generation. Immediate next steps require a complete signal logic review and a retest on a longer timeframe to identify structural flaws.
