ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v649 strategy on ASC delivered an 18.35% return with a 66.7% win rate, yet the 17.18% maximum drawdown and 0.82 Sharpe ratio suggest significant instability. Statistical confidence is critically low given only three trades executed, making the positive ROI a statistical outlier rather than a robust signal. The limited sample size prevents validation of the strategy's edge or risk parameters under normal market conditions. We must expand the backtest dataset to a minimum of 50 trades before deploying live capital.
