ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v902 strategy generated an 87.88% ROI on AMD with a 1.61 Sharpe ratio, yet the 50% win rate and 26.05% drawdown reveal high volatility driven by only two trades. Such a minimal sample size precludes statistical confidence, making the performance a statistical outlier rather than a validated signal. The lack of trade frequency prevents a true assessment of strategy resilience against varied market regimes. Future iterations must prioritize trade volume over raw return percentage to ensure robustness.
