ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v989 strategy on VOXR failed, posting a -2.01% ROI and -0.05 Sharpe ratio across only three trades. The 33.3% win rate and 11.32% drawdown suggest the entry logic lacks robustness in this specific market regime. With such a minimal sample size, statistical noise likely distorts performance rather than revealing a genuine edge. We must not draw firm conclusions from this single run. The next step is to expand the backtest window to accumulate at least 200 trades before evaluating viability.
