-2.01%	-0.05	33.3%	-11.32%

EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1149 strategy failed on VOXR, delivering a -2.01% ROI with a negative Sharpe ratio of -0.05 due to only 3 trades. Such a tiny sample size renders the 33.3% win rate statistically insignificant, while the 11.32% drawdown indicates high volatility risk. The results suggest the current parameters are overfit to noise rather than capturing a genuine edge in this asset. We must widen the sample by adjusting entry thresholds or filtering low-volume periods before deploying live capital. No action is advisable until further statistical validation confirms robustness beyond this anomaly.
