ANALYST NOTE

Hera local LLM

The EVO_VELOCITYSC_v1503 strategy on META failed catastrophically, delivering a -17.5% ROI and a 0% win rate across only three trades. With a Sharpe ratio of -0.85 and a 33.28% drawdown, the approach lacks statistical validity given the minimal sample size, making performance metrics meaningless for live deployment. The strategy clearly failed to identify any profitable entry points within the tested period, suggesting a fundamental misalignment with current market dynamics. The immediate next step is to suspend the bot and re-evaluate parameter thresholds or signal logic before risking further capital.
