ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v1896 backtest on RDN failed catastrophically with a -5.59% loss, zero wins, and a Sharpe ratio of -0.31, indicating a strategy that generated no alpha. With only three trades executed, the sample size is statistically insignificant, rendering the -14.78% drawdown meaningless and preventing any reliable inference of risk. The total absence of winning trades suggests a severe mismatch between the entry logic and current market structure for this asset. We must immediately pause execution and re-evaluate the signal thresholds before deploying any capital.
