ANALYST NOTE

Hera local LLM

The EVO_EVOVELOCIT_v1509 strategy on AMD delivered an 87.88% ROI and a 1.61 Sharpe ratio, yet the 26.05% drawdown and exactly 50% win rate signal a fragile edge. With only two trades executed, the statistical sample size is insufficient to confirm strategy robustness or reliability across different market regimes. The high reward-to-risk profile is promising but currently lacks the historical depth required for institutional deployment confidence. We must expand the backtest window and stress-test against alternative market conditions to validate consistency before live execution.
