ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v1910 strategy on GC=F underperformed with a -4.00% ROI and negative Sharpe ratio, signaling a lack of edge in the current gold futures regime. With only three trades executed, the statistical sample is insufficient to draw robust conclusions or validate the 33.3% win rate. The 12.60% maximum drawdown suggests excessive risk exposure relative to the limited number of signals generated. We must expand the testing window or adjust entry filters to generate a larger dataset before deeming the strategy viable for deployment.
