ANALYST NOTE

Hera local LLM

The FRBA GG3_MACD_Momentum backtest shows a positive 6.92% return, yet the 0.55 Sharpe ratio and 13.51% drawdown reveal fragile risk-adjusted performance. With only two trades executed, these metrics lack statistical significance and cannot reliably predict future behavior. The strategy likely suffered from overfitting to a specific noise pattern rather than capturing genuine market momentum. You should expand the sample size by testing additional years of data or adjusting entry thresholds to filter false signals.
