ANALYST NOTE

Hera local LLM

The VOXR backtest for EVO_EVOEVOE_v1791 shows a -2.01% ROI with only three trades, rendering statistical conclusions impossible. The -0.05 Sharpe and 11.32% drawdown indicate the strategy failed to generate alpha while exposing significant downside risk. Such a tiny sample size creates high variance, meaning this poor performance could easily reverse with more data. We must expand the lookback period or adjust entry filters before deploying live capital.
