ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v2240 strategy on VOXR produced a -2.01% ROI with a single trade loss, yielding a Sharpe ratio of -0.05. The 33.3% win rate and 11.32% drawdown indicate severe underperformance driven by insufficient data volume rather than systemic flaw. With only three trades, statistical confidence is negligible, rendering the negative metrics unreliable for strategic conclusions. A more robust validation requires expanding the sample size to at least 50 transactions to isolate true alpha from noise.
