+41.35%	1.13	66.7%	-21.82%

EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The LPG backtest for EVO_EVOEVOE_v2312 shows a +41.35% ROI with a 66.7% win rate, yet the sample size of only three trades creates insufficient statistical confidence to validate the 1.13 Sharpe ratio or the 21.82% drawdown. The high return likely stems from extreme volatility rather than robust strategy mechanics, making the 1.4x final capital growth risky to replicate. We must execute a larger sample size backtest to confirm if the alpha persists under varied market conditions before considering live deployment. Next, expand the simulation to a full year of data to assess drawdown stability and ensure the edge is not an outlier event.
