ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v231 strategy on VOXR suffered a -2.01% drawdown with a negative Sharpe of -0.05, indicating a net loss across the sample. With only three trades executed, the 33.3% win rate is statistically insignificant and fails to confirm any edge. The maximum drawdown of 11.32% suggests volatility exposure that outweighs the current capital preservation metrics. This sample size is too small to support deployment without further validation. I recommend expanding the backtest horizon to include at least 100 trades before considering live execution.
