ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v249 strategy failed on META, recording zero wins and a -17.50% ROI with a catastrophic -33.28% drawdown. Statistical significance is impossible to calculate given only three trades, making this result highly unreliable. The strategy likely suffered from overfitting or extreme sensitivity to noise during this specific period. I recommend running a parametric sensitivity test to identify which thresholds caused the failures. This analysis is educational and not investment advice.
