ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v311 strategy on META failed catastrophically with a -17.5% ROI and zero winning trades, indicating a complete lack of edge in the current regime. Statistical confidence is negligible given only three trades were executed, rendering the -0.85 Sharpe ratio and 33% drawdown insufficient for definitive rejection. The model likely overfitted to noise or misidentified trend direction, suggesting the signal logic requires fundamental recalibration before re-deployment. We must run a parameter sweep on longer timeframes to validate if the strategy simply lacks adaptability to recent volatility.
