EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v178 strategy on VOXR failed, losing 2.01% with a negative Sharpe ratio and a 33.3% win rate across only three trades. Such a tiny sample size renders the statistical results meaningless and precludes any confidence in the strategy's robustness. An 11.32% drawdown confirms that the risk parameters are too loose for this asset's volatility profile. The immediate next step is to expand the testing window or adjust entry filters to generate a statistically significant dataset before redeployment.
