ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v401 backtest on RDN shows a total loss of 5.59% with a zero win rate across only three trades, yielding a negative Sharpe of -0.31 and a 14.78% drawdown. With such a minimal sample size, these statistics lack statistical confidence and do not reflect the strategy's true performance potential. The near-total failure rate suggests a critical flaw in the current signal logic or parameterization for this specific asset. Before retesting, it is essential to review the entry conditions and filter settings to reduce false signals.
